

Myth BUSTERS

We can't think of a reason for **YOU** not to join **ASME** Membership

Set yourself up for success post-graduation with a professional network and technical organization ready to support you:

The American Society of Mechanical Engineers (ASME).

Join this global society while still in school and jumpstart your career as a mechanical engineer.

ASME Welcomes All Engineering Disciplines

IT TAKES JUST
\$25 and
5 minutes
TO GET STARTED

Why Wait?

Join ASME Today!
ASME.ORG/JOIN

*Save an additional **25%** with promo code: **SECTION**

It's not worth it

ASME offers our entire professional benefits suite to students for just **\$25 a year**—and freshmen can join for free! That's thousands of dollars in member-exclusive resources for the price of a few lattes. *It also makes you eligible for ASME scholarships and financial aid.

Student Sections ARE part of ASME!

Your \$25 ASME dues make you an official ASME Student Member while giving you access to your local club at school. **Any additional student club dues do not equate to membership in the global ASME.*

I'm part of my college club

I'll be the youngest one at the meetings

ASME has special **Student Sections** that allow student members to connect at their university/school. We also provide exclusive student events and competitions throughout the year in addition to professional ASME conferences.

At ASME, we know your schedule is busy, and school can be hard—that's why we make membership easy! Through digital, on-demand resources you can easily access several member benefits right when you need them.

It's too time consuming

I can get resources without membership

Several ASME member benefits are **ONLY** offered to members, including a complimentary subscription to *Mechanical Engineering* Magazine, monthly webinars, and the AccessEngineering library. And any member benefits offered to non-members come at a steep price!
