

“

I find the network and scholarships benefits ASME provides me the most valuable member benefit. I have met countless accomplished engineers, directors, and students with like-minded intentions and motivations. In addition, the financial support from scholarships has been incredibly helpful in my continuing education.

”

-Isha Taylor (USA)

What You Should Know: Student Scholarships

Am I Eligible?

You must be enrolled full-time at an ABET accredited, or substantially equivalent, engineering degree program at a community college, college, or university. ASME student membership is also required.

When Can I Apply?

The online Scholarship Application or the 2023-2024 academic year opens in December 2022 for Undergraduate Students, Graduate Students and High School Seniors pursuing ME/MET degrees and closely related disciplines.

What's Available?

You can filter by education level, area of study, or global region to search more than 40 available ASME scholarships.

Our student membership is a great way for future engineers to establish their network and build professional skills needed when entering the workforce. But we're also here to support our student members on their academic journey getting there! ASME Student Membership costs just \$25 but could earn you thousands through the ASME Scholarship Program.
